DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 16 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim(s) **16 is** rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing (Reference the May 15, 2008 memorandum issued by Deputy Commissioner for Patent Examining Policy, John J. Love, titled "Clarification of 'Processes' under 35 U.S.C. 101"). The instant claims neither transform underlying subject.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 16 is rejected under 35 U.S.C. 102(e) as being anticipated by Oprea U.S. Pub No 20040192218 A1.

As per claim 16, Oprea teaches a multicarrier communication method comprising: a step of detecting channel quality of sub carriers (see paragraphs [0046], [[0058], [0106]]); and a spatial-subspace modulation is the same as the claimed modulation diversity modulation step of carrying out modulation diversity modulation (see paragraphs [0058], [0082-0083] while adaptively changing an interleave pattern of I_{ch} components and/or Q_{ch} components (see [0083], [0089], [0094-0097]) according to channel quality of sub carriers.

Allowable Subject Matter

4. Claims 1-5, 7-10 and 12-15 are allowed over the prior arts of record.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
6. Raghothaman et al U.S. Pub No 20050111376.
7. Perahia et al U.S. Patent No 7,352,688 B1
